

FORGE TALENT CONNECTIONS

Get Your 5 AI Keys

One page per company. Tick each box as you go.

You cannot get lost — every step tells you how to know it worked.

● THE ONE RULE — READ THIS TWICE

Never type or paste a key into this PDF. Not in a box, not in a note. Keys go in ONE place only: the **.env** file on your computer.

Never email a key. Never screenshot a key. Never put one in a chat window.

What you'll do 5 times

The same 4 things at every company. That's the whole job.

1

Make an account

Use the same email every time.

2

Add a payment card

Most need one before a key will work.

3

Create the key & paste it into **.env**

Paste it the SECOND you see it. Most sites never show it again.

4

Copy the model name

Write it in the box on that page. This one is safe to write down.

⚠ IF YOU ONLY REMEMBER ONE THING

The key is shown **once**. Have your **.env** file already open before you tap "create". Paste, save, then carry on.

✓ HOW YOU'LL KNOW YOU'RE FINISHED

All 5 pages ticked, then the checker on the last page prints **PROFILES OK**. That is the finish line. Nothing else is needed.

START HERE

SEAT 1 OF 5 • GOES IN ADJ_SEAT_1_API_KEY

ChatGPT

by OpenAI • platform.openai.com

STEP 1 • GO TO THE KEYS PAGE

Open **platform.openai.com/api-keys** in Safari and sign in. This is the developer site, not the ChatGPT chat site.

✓ **You'll know it worked:** You see a page titled **API keys** with a "Create new secret key" button — not a chat box.

STEP 2 • ADD MONEY FIRST

Tap **Settings** → **Billing** and add a card. Add credit — the smallest allowed is \$5.

✓ **You'll know it worked:** Your balance shows a dollar amount above \$0.

STEP 3 • OPEN YOUR .ENV FILE NOW

Before the next step, open your **.env** file and put your cursor after **ADJ_SEAT_1_API_KEY=**

✓ **You'll know it worked:** Your .env file is open and waiting. Do not skip this.

STEP 4 • CREATE AND PASTE IMMEDIATELY

Tap **Create new secret key**. The key appears **ONCE**. Copy it and paste it into **.env** right now. Save the file.

✓ **You'll know it worked:** Your .env line reads **ADJ_SEAT_1_API_KEY=sk-...** and the file is saved.

STEP 5 • WRITE DOWN THE MODEL NAME

Find the model list on their site. Look for **GPT-5.6 Sol** and copy its exact ID text.

✓ **You'll know it worked:** You have the exact ID copied — write it in the box below.

🔗 USE THIS MODEL

GPT-5.6 Sol

OpenAI's newest flagship. This is the one you picked — good pick.

✍ Write the exact model ID here (this is NOT secret — safe to write)

💰 Reported at about \$5 per million words in, \$30 out. Confirm on their pricing page.

STOP — ChatGPT is finished

Every box on this page ticked? Then there is nothing else to do here.
Turn the page.

Gemini

by Google • aistudio.google.com

- ☐
- STEP 1 • GO TO THE WEBSITE

Open **aistudio.google.com** and sign in with your Google Workspace account.

✓ **You'll know it worked:** You are inside **Google AI Studio** and see your email top-right.

- ☐
- STEP 2 • FIND THE KEY BUTTON

Tap **Get API key** — usually top-left or in the menu.

✓ **You'll know it worked:** A panel opens showing API keys, probably empty.

- ☐
- STEP 3 • OPEN YOUR .ENV FILE NOW

Open **.env** and put your cursor after **ADJ_SEAT_2_API_KEY=**

✓ **You'll know it worked:** Your .env file is open and waiting.

- ☐
- STEP 4 • CREATE AND PASTE IMMEDIATELY

Tap **Create API key**, then copy it and paste into **.env** right now. Save.

✓ **You'll know it worked:** Your .env line reads **ADJ_SEAT_2_API_KEY=Alza...** and is saved.

- ☐
- STEP 5 • PICK THE PRO MODEL — NOT FLASH

Open their model list. Find the **Pro** tier (the most capable one, not "Flash"). Copy its exact ID.

✓ **You'll know it worked:** The ID you copied contains the word **pro**, not **flash**.

📌 USE THIS MODEL

Gemini Pro (NOT Flash)

⚠️ CHANGE FROM YOUR PICK. You said Flash. Flash is the fast, cheap tier — it will miss things and its misses will look like the whole panel's misses. Pick the **Pro** tier instead.

✍️ Write the exact model ID here (this is NOT secret — safe to write)

🌐 Google has a free tier that works without a card. Paid pricing is on their site.

STOP — Gemini is finished

Every box on this page ticked? Then there is nothing else to do here.
Turn the page.

Mistral

by Mistral AI • console.mistral.ai

STEP 1 • GO TO THE WEBSITE

Open **console.mistral.ai** and sign up or sign in.

✓ **You'll know it worked:** You are on a dashboard, not the marketing homepage.

STEP 2 • ADD A PAYMENT CARD

Find **Billing** and add a card. Mistral needs this before a key will work.

✓ **You'll know it worked:** Billing shows a card on file.

STEP 3 • OPEN YOUR .ENV FILE NOW

Open **.env** and put your cursor after **ADJ_SEAT_3_API_KEY=**

✓ **You'll know it worked:** Your .env file is open and waiting.

STEP 4 • CREATE AND PASTE IMMEDIATELY

Go to **API Keys** and create one. Copy and paste into .env right now. Save.

✓ **You'll know it worked:** Your .env line reads ADJ_SEAT_3_API_KEY=... and is saved.

STEP 5 • WRITE DOWN THE MODEL NAME

In their model list find **Magistral Medium** and copy its exact ID.

✓ **You'll know it worked:** You have the exact ID copied.

🎯 USE THIS MODEL

Magistral Medium

This is Mistral's **reasoning** model — it thinks step by step before answering. That is exactly the job here, so it beats their general 'Large' model for this.

✍ Write the exact model ID here (this is NOT secret — safe to write)

💰 Pay per use. Price is on their pricing page.

STOP — Mistral is finished

Every box on this page ticked? Then there is nothing else to do here.
Turn the page.

Grok

by xAI • console.x.ai

STEP 1 • GO TO THE WEBSITE

Open **console.x.ai** and sign up or sign in.

✓ You'll know it worked: You are on the xAI **Console**, not the Grok chat app.

STEP 2 • CHECK YOUR CREDIT

Look at **Billing**. New accounts are reported to start with free credit.

✓ You'll know it worked: You can see a credit balance or a card on file.

STEP 3 • OPEN YOUR .ENV FILE NOW

Open **.env** and put your cursor after **ADJ_SEAT_4_API_KEY=**

✓ You'll know it worked: Your .env file is open and waiting.

STEP 4 • CREATE AND PASTE IMMEDIATELY

Tap **API Keys** in the left menu, create a key, copy and paste into **.env** right now. Save.

✓ You'll know it worked: Your key starts with **xai-**. If it does not, it is not an xAI key.

STEP 5 • WRITE DOWN THE MODEL NAME

In their model list find **Grok 4.3** and copy its exact ID.

✓ You'll know it worked: You have the exact ID copied.

🎯 USE THIS MODEL

Grok 4.3

xAI's current flagship. Thinking is switched on by default, which is what you want here.

✍ Write the exact model ID here (this is NOT secret — safe to write)

📄 New accounts are reported to get \$25 free credit to start. Then pay per use.

STOP — Grok is finished

Every box on this page ticked? Then there is nothing else to do here.
Turn the page.

Claude

by Anthropic • platform.claude.com

- ☐ **STEP 1 • GO TO THE WEBSITE**
Open `platform.claude.com` and sign in. This is the developer console, not the Claude chat app.

✓ **You'll know it worked:** You see a Console dashboard with billing and keys — not a chat box.

- ☐ **STEP 2 • ADD MONEY FIRST**
Open Billing and add a card plus some credit.

✓ **You'll know it worked:** Your balance shows an amount above \$0.

- ☐ **STEP 3 • OPEN YOUR .ENV FILE NOW**
Open `.env` and put your cursor after `ADJ_SEAT_5_API_KEY=`

✓ **You'll know it worked:** Your `.env` file is open and waiting.

- ☐ **STEP 4 • CREATE AND PASTE IMMEDIATELY**
Tap `Get API key`, copy it, paste into `.env` right now. Save.

✓ **You'll know it worked:** Your `.env` line reads `ADJ_SEAT_5_API_KEY=sk-ant-...` and is saved.

- ☐ **STEP 5 • WRITE DOWN THE MODEL NAME**
Find Claude Opus 5 in their model list and copy its exact ID.

✓ **You'll know it worked:** You have the exact ID copied.

🎯 USE THIS MODEL

Claude Opus 5

Your main seat, and the reasoning flagship. The ID is reported to be `claude-opus-5` — confirm it on their model page.

✍ Write the exact model ID here (this is NOT secret — safe to write)

💰 Reported at about \$5 per million words in, \$25 out. Confirm on their pricing page.

STOP — Claude is finished

Every box on this page ticked? Then there is nothing else to do here.
Turn the page.

LAST PAGE

Finish Line

Two commands. Then you are done.

⚠ BEFORE YOU RUN ANYTHING

Your `.env` file should now have 5 keys and 5 model IDs filled in. No blanks. No quotes around them.

STEP 1 • CHECK YOUR WORK

Run: `python run_adjudication.py --check-profiles profiles.json`

✓ **You'll know it worked:** it prints **PROFILES OK**. This costs nothing — it never touches the internet.

STEP 2 • IF IT LISTS PROBLEMS

Fix them and run it again. It lists every problem at once, so you only go round once.

✓ **You'll know it worked:** the list is empty and you see PROFILES OK.

STEP 3 • THE REAL RUN

Run the tool on a real piece of work, with all 5 seats and all 5 passes.

✓ **You'll know it worked:** you get an ANSWER section and a HOLES section.

✓ WHAT THE FIRST RUN IS FOR

The first run's job is to **measure** whether your 5 AIs really think differently. Treat its answer as a first draft, not a verdict. After that you'll know how many seats you actually need.

● FINAL SAFETY CHECK

Look at this PDF. Is there a key written anywhere on it? There must not be. Keys live only in `.env`, only on your computer.

That's everything

5 keys. 5 model names. One green check.
There is no step 6. You are done.

Honest notes

Small print that matters. Read once.

⚠ WHERE THESE MODEL NAMES CAME FROM

The five vendor documentation sites were **blocked** from this machine, so these names come from web search, not from the vendors' own pages. That is why every page asks you to **copy the exact ID off their site** rather than trusting a name printed here.

If a name here does not match what you see on their site, **their site is right**.

⚠ GOOGLE, SEPTEMBER 2026

Reports mention older Google keys stopping work in September 2026. Keys you create fresh in AI Studio are already the new type, so making a new one now avoids this.

✅ WHY 5 DIFFERENT COMPANIES

Five models from five companies make **different** mistakes. Five from one company make the **same** mistake and agree with each other — which looks like confidence and is not. Your pick of five separate companies is the right instinct.

● PRICES CHANGE

Any dollar figure here is what search reported in August 2026. The vendor's own pricing page is the truth.
